

BACKHOE

ES 640 for Mini Skid Steer Loaders

FEATURES:

- Mounts easily to any skid steer
- Ideal for fast and efficient excavating and trenching
- This curved boom design can reach into the hard to reach places for excellent digging performance
- Requires a hydraulic system of 5-7 GPM
- Dual-cylinder swing provides maximum swinging power
- Fold down legs provide excellent digging stability
- Available with optional tie back kit
- All main pivot greasable for easy maintenance
- Full width replaceable bronze bushings on all wearable pivot joints
- Boom & rotation lock for safe easy transport
- Buckets are built using AR 400 steel for long lasting performance
- 9", 12" buckets have 3 teeth, 15", 18" buckets have 4 teeth, 24" buckets has 5 teeth
- 24" smooth buckets are also available
- Available with optional street pads

Excavator designed boom allows for closer retraction of the bucket to the boom arm.

Heavy-duty buckets are made of AR 400 steel and available in widths of 9", 12", 15", 18", 24"

OPTIONS:

- Tie Back Kit

Easily accessible, ergonomically designed control station.

Dual cylinders allow for smooth, strong, consistent movement throughout the entire 180 degree swing range.

Cushioned swing cylinder dampens the swing at the end of the stroke, preventing unnecessary banging of the boom arm. This allows for smooth operation.

The stabilizers widen the center of gravity, making the narrow profile of your skid steer more sturdy when swinging the boom laterally.

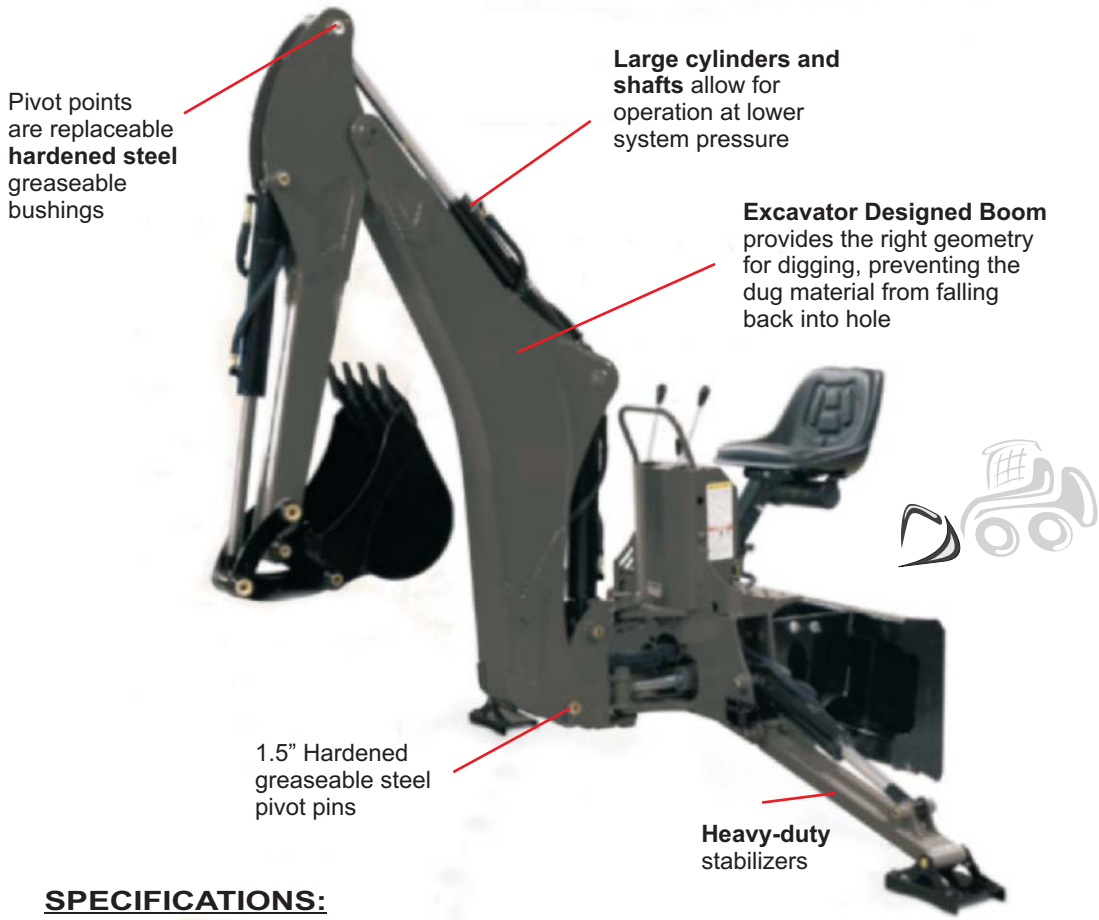

All products are subject to change without notice or liability.

E4

Pivot points are replaceable **hardened steel** greaseable bushings

Large cylinders and shafts allow for operation at lower system pressure

Excavator Designed Boom provides the right geometry for digging, preventing the dug material from falling back into hole

1.5" Hardened greaseable steel pivot pins

Heavy-duty stabilizers
