

SNOW / DOZER BLADE

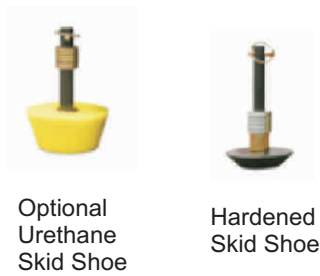

FEATURES:

- An excellent solution for moving snow and dirt
- Heavy duty 3/16" plate gusseted mold board
- Heavy duty main frame and supports are constructed using 3/8" & 1/2" plate
- Blade can be operated in a spring trip setting for snow removal or bolted into a stationary position for dirt moving applications
- Spring trip feature dramatically decreases chances of blade damage
- 30 degree hydraulic angling left and right power by two 3" rams
- Adjustable skid shoes help protect grading surfaces and blade from damage
- 5/8" x 6" bolt on beveled carbon steel cutting edge has two mount positions for increased wear life
- All pivot and ram points are serviceable
- Extension chain prevent over extension of spring
- Durable paint finish

SPECIFICATIONS:

Optional Urethane Skid Shoe

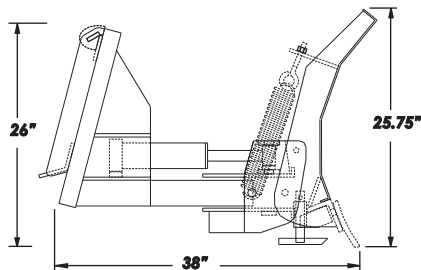

Hardened Skid Shoe

Model #	Spring Trip	Blade Adjustment	Blade Width	Blade Width @ 30 degree Angle	Blade Height	Approx. Weight
SDB 72	Yes	Hydraulic	72"	62 1/4"	27"	600 lbs.
