

SNOW / LIGHT MATERIAL BLADE

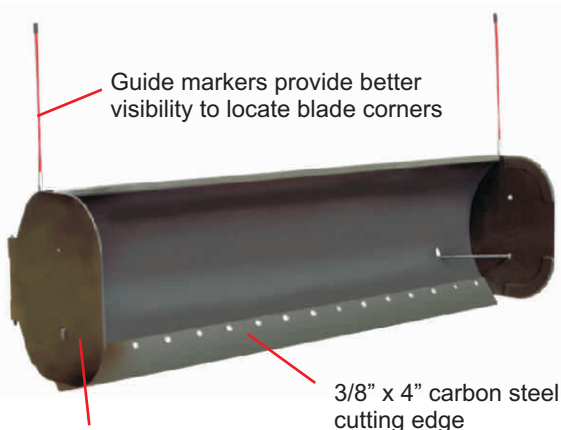

FEATURES:

- Designed to fit skid steers and compact loaders with the universal mount
- The Snow Light Material Blade is an excellent solution for moving snow on driveways, parking lots and pathways or blading light dirt and fill
- Durable main frame and supports are constructed using 1/4" & 3/8" plate
- Blade can be operated in a spring trip setting for snow removal or bolted into a stationary position for dirt moving applications
- Four 3/8" diameter wire extension springs - comprise our Spring Trip feature which dramatically decreases chances of blade damage
- 25 degree hydraulic angling left and right powered by one 3" rams
- Adjustable hardened skid shoes help protect grading surfaces and blade from damage
- Two Guide Markers for easy blade corner location
- 3/8" x 4" bolt on carbon steel cutting edge
- Blade is 28" tall has a curved top to roll snow ahead of machine
- All pivot and ram points are serviceable
- Durable paint finish
