

# SOIL CONDITIONER

Hydraulic motor mounts inside the exclusive **Direct Drive Rotor** eliminating reduction chains, sprockets, gears, or bearings.

The Tungsten Carbide Tooth was engineered and designed for the mining industry to cut through rock - making it the strongest tooth in the industry.

Long wearing **tungsten carbide teeth** are aggressive in tough, rocky soils; perform better in wet conditions and reduce downtime.

## FEATURES:

- Built for skid steers loaders with the universal mount
- An excellent solution for raking stones, roots and debris to either side or straight ahead for easy pick up
- The Soil Conditioner will save hours of labor and is ideal for seed bed preparation
- This unit has a larger drum and performs like a roto-tiller and will rake up to 4" deep, while it removes high spots and fills in low spots
- The large drum size also enables you the increase your ground speed and improve productivity
- Tungsten Carbide Teeth last longer and are very aggressive in tough or rocky soils and perform better in wet conditions
- Direct Drive Rotor eliminates reduction chains, sprockets, gears or bearings and gives higher production and lower maintenance
- Isolator Hitch decreases noise and vibration
- Depth can be adjusted on the go
- Solid rubber tires
- Dethatches and removes old turf and weeds while conditioning the soil

## Optional:

- Universal wire harness for hydraulic models with attachment controls. Fits Cat/ASV (8 pin) and John Deere/New Holland/Case/Bobcat (14 pin)
- Pistol Grip Control Harness is required if skid steer is **NOT** equipped with attachment control system. (Only need when ordering hydraulic angling model).

E11

**Isolator Hitch** decreases noise and vibration vis a rubber shock bushing. Depth adjustments can be made on-the-go

**Direct Drive Motor** gives higher production with lower maintenance.

Front and back **Rubber Shield** for safety and reduction of dust.

**Large Solid Rubber Tires** allow easier maneuverability over rough terrain
