

SNOW WOLF - ULTRA SERIES FASTTACH SNOW PUSHER

ULTRA FASTTACH

Fast, really fast.

The FastTach transforms your angle plow into a snow pusher in **less than 5 seconds**, while you operate it from your cab. If you're a contractor who plows townhomes, condominiums, or have a wide variety of different properties in your portfolio, the FastTach will change the way you work. It is truly the very best of two worlds – an angle plow and a snow pusher – all in one smooth operation.

Maximum Snow Containment

Urethane Sideplate Shoes

FAST TACH

by SNOW WOLF

- 1 Maximum Snow Containment:** If you've ever used a stationary snow pusher, you know how frustrating it is to turn a corner and lose most of your snow load. With the Ultra Series and FastTach, you simply angle your blade to maintain full snow load containment when turning around islands, corners and obstructions.
- 2 One-Pass Scraping:** Are you sick and tired of rubber cutting edges? Ever wish you had a snow pusher that would scrape properly? One you could put some down-pressure on? Wish you didn't have to go over everything twice? Could **minimize your salt usage**? The Ultra Series blade **maintains its down-pressure and incredible scraping ability**, even when the FastTach is hooked up.
- 3 Urethane Sideplate Shoes:** The highly durable Urethane Sideplate Shoes last for the long haul, and won't damage curbs and other obstacles.

2 One-Pass Scraping
