

The Flex Hitch Swivels Left and Right making corners easy to negotiate.

The Flex Hitch allows the Arena Quantum 2.5" of up and down movement, making the Quantum's travel independent of the tractor, eliminating bounce.

FEATURES:

- The Conterra Arena Quantum is designed to be pulled with a 3PT Hitch Tractor.
- Commercial Grade Teeth are offset on 8" centres for optimal grooming coverage.
- Three Levelling Bars remove high spots and fill in low spots providing superior level footing.
- The Rear Footing Stabilization Bar, adjusted using the Side-Wind Jack, allows you to alter compaction as required, and ensures a smooth surface for the roller, enhancing a firm top-dressing.
- The Floating Flex-Hitch eliminates groomer skid around corners, allowing the groomer to travel in its own tracks.
- The 2-Piece Roller improves arena stabilization and further reduces roller skid, allowing each section of the roller to travel at independent speeds around corners.
- Grooming Depth is managed by the Hydraulic Depth Control System with a range from 0" to 7.5" deep.
- The Conterra Arena Quantum Teeth has the most durable tooth on the market. It is a pin-on commercial grade digging tooth, 2" wide x 6" long, and easily replaced.
- Large Floatation Tires are located inside the frame eliminating tire tracks on the groomed surface.
- The Frame is constructed from 3-1/2" square tube with 1/4" laser cut steel side-plates, for years of dependable service.
- All three Levelling Bars are laser cut from 3/8" steel plate.
- Footing Stabilization Bar is laser cut from 1/4" steel plate.
- 2-Piece Rear Roller is suspended by 4 x 1-1/2" heavy duty serviceable bearings.
- Two sizes to choose from, 96" & 112" wide.
- Durable black paint finish.
- Optional Wet Kit: PTO driven 120 gallon water kit available.

Model	Recommended Power	Width	Length
CAQ 96	50 - 80 HP	96" / 8ft	74"
CAQ 112	80+HP	112" / 9.4ft	74"
